To: The Executive Officer

RE: *Mid America Agri Products/Wheatland, LLC* Ethanol Plant – Accuracy of Data in New Pathway Application and Appropriateness of the Production Period Used in New Pathway Lifecycle Analysis

This is to certify that the quantities of corn, undenatured ethanol, distillers grains solubles co-products and utilities summarized in the *Mid America Agri Products/Wheatland, LLC* application for a new pathway for the *Mid America Agri Products/Wheatland, LLC Madrid, Nebraska* ethanol plant are true and accurate. These quantities represent the true and accurate production, feedstock use and utility consumption of our plant located at 76080 RD 338, *Madrid, Nebraska* and owned by *Mid America Agri Products/Wheatland, LLC*.

For the calculation of the new pathway carbon intensity value, we have used data from November, 2012 to October, 2014 ("Production Period"). We believe the Production Period data provides a fair and accurate representation of our operation and proposed pathway, and fully takes into account the seasonal and operational variability of our production facility. We are confident that the future operation of our facility will be such that over the same period of time as the Production Period, the input variables defining our pathway will be as good as, or better than, the input variables used to calculate the carbon intensity value of our requested new pathway.

Respectfully,

A handwritten signature in blue ink that reads "Robert Lundeen".

Robert Lundeen, CEO
